- Max Score: 30 Points

camelCase

There is a sequence of words in camelCase as a string of letters, `s` , having the following properties:

- **It is a concatenation of one or more *words* consisting of English letters.**
- **All letters in the first word are *lowercase*.**
- **For each of the subsequent words, the first letter is *uppercase* and rest of the letters are *lowercase*.**

Given `s` , determine the number of words in `s`.

Input Format

A single line containing string .

Output Format

A single integer which is the total number of words in the string

Example 1

Input

```
saveChangesInTheEditor
```

Output

```
5
```

Explanation

String contains five words: save, Changes, In, The, Editor.

Example 2

Input

```
oneTwoThree
```

Output

```
3
```

Explanation

String contains five words: one, Two, Three.

Constraints

- **1 <= s.length <= 10^5**

Topic Tags

- **Strings**

My code

```
// in java
import java.util.*;
import java.lang.*;
import java.io.*;

public class Main
{
	public static void main (String[] args) throws java.lang.Exception
```

```
        {
                //your code here
        Scanner s=new Scanner(System.in);
        String str=s.next();
        int count=1;
        for(int i=0;i<str.length();i++)
        {
          char ch=str.charAt(i);
          int c=ch;
          int z='a';
          if(c<z) count++;
        }
         System.out.print(count);
        }
}
```
