- Max Score: 30 Points

Digit sum

Write a Java program to calculate the sum of the digit number. It is given that the number is always a 3 digit number.

Input Format

The first line contain n .

Output Format

Print the sum of the digit number.

Example 1

Input

122

Output

5

Example 2

Input

344

Output

Constraints

$100 \leq n \leq 999$

My code

```
// n java
import java.util.*;

public class Main {
    public static void main(String[] args) throws Throwable {
        Scanner s=new Scanner(System.in);
        int n=s.nextInt();
        int ans=0;
        while(n>0)
        {
            ans=ans+n%10;
            n=n/10;
        }
        System.out.print(ans);
    }
}
```
